

**NOTE: These instructions are for the 2010-Current model years ONLY!
See below for 2009 and prior years.**

KIT CONTAINS:
HOOD PROTECTOR
2 PLASTIC INSERTS
2 SCREWS
2 WASHERS
TOOLS NEEDED:
10mm NUT DRIVER
FLAT SCREWDRIVER
MASKING TAPE

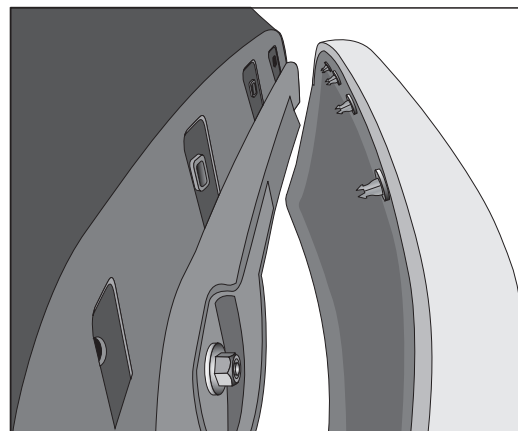

- ❶ Raise the hood and from underneath disconnect the metal hood lock rod attached to the hood lock mechanism. (1)
- ❷ Remove the 10 bolts that hold the grill to the hood. 4 along the top edge and 3 on each of the side brackets.
- ❸ Slowly lower the hood and carefully remove the grill by prying it away from the hood using the tape wrapped flat head screwdriver, or a plastic pry tool if available. (2)
- ❹ Clean off any dirt that may be present on the hood and insert the 2 grommet nuts into the 2 holes in the hood that line up with the holes of the large mounting tabs of the hood protector.
- ❺ Align the 2 holes in the hood protector to the holes in the hood with the grommet nuts and attach it with screws and washers
- ❻ Carefully lower the hood and re-install the grill. Ensure that the hood protector tabs are in between the grill and the hood.
- ❼ Re-attach the hood with the previously removed 10 bolts on the backside of the grill. Re-attach the hood lock mechanism. Re-attach the plastic trim piece by sliding the top side clips in first, then snapping the remaining clips into place. (3)

(fig.1)

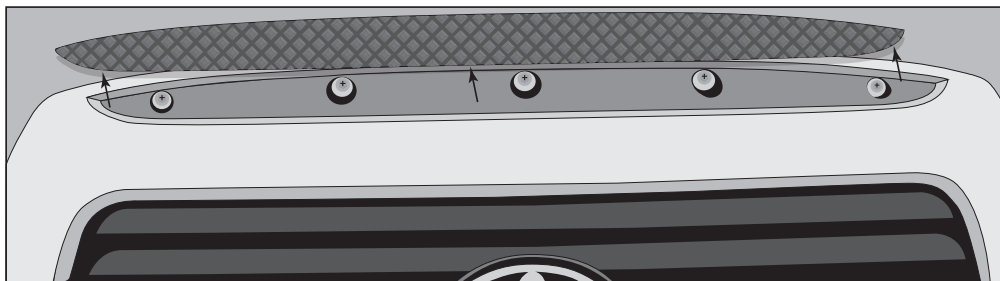

(fig. 2)

(fig. 3)

NOTE: These instructions are for 2009 and prior years.

- ❶ Carefully pry off the long plastic trim piece on the grill to expose the 5 bolts underneath using a flat head screwdriver with the tip wrapped in masking tape. (4)
- ❷ With the trim piece removed remove the 5 bolts with a 10mm nut driver.
- ❸ Raise the hood and from underneath disconnect the metal hood lock rod attached to the hood lock mechanism. (1)
- ❹ Remove the 10 remaining bolts that hold the grill to the hood. 4 along the top edge and 3 on each of the side brackets.
- ❺ Slowly lower the hood and carefully remove the grill by prying it away from the hood using the tape wrapped flat head screwdriver.
- ❻ Clean off any dirt that may be present on the hood and insert the 2 grommet nuts into the 2 holes in the hood that line up with the holes of the large mounting tabs of the hood protector.
- ❼ Align the 2 holes in the hood protector to the holes in the hood with the grommet nuts and attach it with screws and washers
- ❽ Carefully lower the hood and re-install the grill. Ensure that the hood protector tabs are in between the grill and the hood.
- ❾ Re-attach the hood with the previously removed 5 bolts under the plastic trim piece and the 10 bolts on the backside of the grill. Re-attach the hood lock mechanism. Re-attach the plastic trim piece by sliding the top side clips in first, then snapping the remaining clips into place. (3)
