Painting Lexan and Acrylic Bug Shields

READ ALL INSTRUCTIONS CAREFULLY AND COMPLETELY BEFORE STARTING PROCEDURE. CHECK FIT BEFORE PAINTING. LUND WILL NOT WARRANT PAINTING COSTS ON MISFITTING SHIELDS.

Preparation

DO NOT USE SOLVENT CLEANERS OF ANY KIND TO CLEAN THE SHIELD. THIS WILL DAMAGE THE SHIELD

When preparing the shield for painting, be sure to work on a soft clean surface to ensure the shield will not be scratched.

- 1) The shield needs to be washed thoroughly using a mild liquid dish soap (without grit) and a soft cotton cloth.
- 2) Rinse all traces of soap off with clean water.
- 3) Dry with a soft clean cotton cloth.

Caution: DO NOT leave any water or soap streaks on the inside of the shield.

- 4) Mask off the outside face of the shield with masking tape.
- 5) Trim the tape flush with the outer edge of the shield.
- 6) Clean out the inside surface again making sure that there is no streaks, finger prints, or imperfections, because paint will not hide these imperfections.

DO NOT sand or scruff the inside of the shield before painting. The solvents in the paint will adhere to the plastic.

Painting the Shield

DO NOT USE ACRYLIC LACQUER. The harsh solvents will cause crazing (hair-line cracks in the shield).

Use only the following paints:

Epoxy Based Paints

- Imron PC by Dupont
- Ureblo by Martin Senour
- Senour -Startthane by PPG
- Mirathane by R-M

Urethane Based Paints

- Chromabase by Dupont
- TEC/Base by Martin Senour
- Deltron by PPG
- Solo by R-M

Acrylic Enamel Based Paints

- Centari by Dupont
- Acrylic Enamel by Martin
- Delstar by PPG
- Miracryl 11 by R-M

Note: Light coats and dry times are a must to prevent crazing.

- 1) Mix Paint
- 2) Spray 1 light dry coat and let dry 10 minutes
- 3) Spray 1 light dry coat and let dry 10 minutes
- 4) Spray 1 wet coat and let dry 10 minutes
- 5) Spray 1 wet coat and let dry 10 minutes
- 6) Apply 1 final wet coat
